

## Sling issues? You *need* to check out the new, innovative Easy Access Continental Sling!

### Silvlea Easy Access Continental Sling

#### Key Features & Benefits

- \* Available in Sizes Extra-Small to Extra-Large
- \* Excellent trunk support
- \* Easy application -- including for clients able to apply the sling themselves
- \* Multiple uses for many client's needs

*Do you have a challenging situation, where you can't find a sling that gives you enough support for toileting or a simple transfer? Or you might have a challenging client who has MS, Parkinson's, ALS, Low or High Muscle Tone? Personally, I've been able to help many clients who have a challenging situation with choosing a sling that provides comfort and support. There are a lot of success stories... all credit to this sling.* - Helena Brennert, RN, BSN, Clinical Educator - HME

*I have used the Continental Hygiene Sling quite successfully with a couple of children with both dystonic and high extensor tone presentations. The firm back allows us to place the sling without much trouble at all, and because it is a hygiene sling, we can get it fully set up without ever undoing the child's lap belt. Once they are lifted, the children maintain a great position and have appeared quite relaxed. This has been a great sling for these children in particular and is an excellent option to have.* - Patricia Lee, PT

- \* Great for difficult or challenging client conditions
- \* Innovative design allows for multiple uses
- \* Excellent support

To book a trial of the Easy Access Continental Sling, or any of our other great products, please contact your local sales representative today.
