

LTC 4000 Ultra 55 Mattress

For Pressure Redistribution , Longevity and Greater Weight Capacity

The LTC 4000 “Ultra 55” mattress has been designed to provide maximum comfort and pressure redistribution for patients in long-term care and hospital environments.

- Memory foam top comfort layer
- Firm centre core
- Transfer borders
- Fire rated CAL 117 materials
- Non-allergenic, anti-bacterial, anti-microbial cover
- Designed for use on adjustable bed frames

Features and Benefits:

- Unique core and topper combination allows the body to feel the full benefit of memory foam cradling comfort
- Strong balance of pressure redistribution, temperature control, and non-allergenic properties
- Aids those with skin and tissue sensitivity, providing comfort and dissipation of heat
- Ideal for patients with heat and pressure sensitivity, and for those with sleep hyperhidrosis that require breathable pressure redistribution
- Excellent for facilities that require a mattress for multiple users with higher weight requirements

Specifications:

- **Pressure Reducing Top Layer:** 5.0 lb density memory foam / 12 IFD
- **Transfer Borders:** 2.6 lb density / 70 IFD
- **Core:** 2.9 lb density / 52 IFD
